Project Scope

This project will use a raspberry pi to monitor my internet speed. I will use InfluxDB and Grafana to store and graph the data. The speed test will be from Ookla's speedtest https://www.speedtest.net/. The speed test will run by using a python script. This will output data as a csv file for monitoring my internet speeds. I will automate this process using a crontab so I can run it routinely for more accurate data.

Project: Raspberry Pi Internet Speed Monitor

Overall Status: ON TRACK

Major Milestones

Stage	Date & Status
Milestone 1	March 9, 2021
Milestone 2	March 16, 2021
Completion	March 23, 2021
